

All-in-One Battery Charger

Charge Virtually All Batteries

The BCUN13 is a universal fast charger for battery packs used in cameras, camcorders and mobile phones, plus for charging AA and AAA batteries. With the help of an adjustable contact set, the BCUN13 is able to charge nearly all common Li-ion battery packs for cameras, camcorders and mobile phones. In addition, the unit is also able to charge USB equipment via its USB output port.

Features:

- ▶ Charges most digital camera, camcorder and mobile phone lithium-ion and Nickel Metal-Hydride batteries from 3.6 - 7.4 volts
- ▶ Charges 2 AA/AAA NiCd/NiMH batteries
- ▶ International 100-240V AC and DC car cord plus EU & USA plugs included
- ▶ USB port simultaneously charges mobile phone, MP3 & other handheld device
- ▶ LCD indicator for charging and detail battery information
- ▶ Automatic battery type and voltage/faulty battery detection
- ▶ Adjustable tension & contact design fits most battery types. No plates necessary
- ▶ Approximate charge times*: 500mAh ~ 30 minutes; 1000mAh ~ 1 hour; 2000mAh ~ 2 hours; 3000mAh ~ 3 hours; 4000mAh ~ 4 hours; 6000mAh ~ 6 hours

DIGITAL CAMERA/CAMCORDER

MOBILE PHONE

AA/AAA RECHARGEABLE

Model: BCUN13

Available colors: black

General Specifications:

Power Source: 12VDC (100-240VDC)

Input Current: 1000mA

Output Charging Current: 1000mA Max. (3.6V Li-ion/7.2V Li-ion/Ni-CD/NiMH)

USB Output: 5V / 1000mA

Charge Termination: 130mA max. (Li-ion Battery) Negative Delta V detection (Ni-CD/ Ni-MH battery)

Timing Protection: Max. 7 hours (Li-ion battery)Max. 6 hours (Ni-CD/ Ni-MH Battery)

LCD Indication: - Power status - Type of battery - Type of voltage
- Battery capacity and charging status - Fault indication - USB port status

Dimension (cover closed): L: 106mm X H: 30mm X W: 60mm

Operating Temperature: 32° F~104° F (0° C~40° C)

*Charge time vary depending on the capacity and condition of the battery.

Safety Standards:

Safety: Output short-circuit protection, overload/temperature protection.
