DHG Vari. ND filter ND2-ND400

Color

Black

Material

Aluminum (Frame)

Sizes

58mm, 67mm, 72mm, 77mm

Main Features

1. Adjustable ND2-ND400 light control
2. Ultra thin screw thread frame design
3. Japanese original light reducing material

Product Description

- Marumi DHG Vari. ND2-ND400 filter allows you to adjust neutral density freely from ND2 to ND400.
- With one single filter, you can create different densities by simply rotating it like a CPL filter.
- Perfect to create slower shutter speed under heavy sunlight without altering the color tone of the photograph.
- You don't have to carry a bunch of ND filters for shooting.
